

Got some more storm clean up done at the farm—we have quite a pile of trees and more to add as time allows.

Armstrong received .72 of an inch precipitation during the week and Neely-Kinyon (NK) received 1.29 inches. Crops look real good in this area. Some fields are starting to show tassels.

Activities:

- Clean up of more trees and limbs from storm damage

- Loaded out 44 head off McNay bulls to Dakota City for harvest and carcass data collection

- Randy mowed oat trial at NK

- Dan sprayed post on corn and soybean Date of Planting trial and soybean breeder's trial

- Randy cultivated corn in LTAR plots

- Cabbage, kale and broccoli are being picked in the garden

- Randy mowed the old pasture area at NK that was seeded to prairie grass last fall

- Guys got some equipment cleaned up and out away for the season

- Started to feed cattle in pasture, as grass is starting to get short

- Pushed manure out of cattle hoop barn

- Still making some final plans on FIMS bunks in cattle shed

- Starting to make plans on replacing damaged fencing in cattle hoop barn, so that I can at least hold some cattle in there when needed.

- Worked on year-end inventory

Hope this find you all well and will enjoy the holiday.
