

Summer has arrived with the warm temperatures and wind over the weekend.

No precipitation was received over the week at either farm.

Activities:

Dan got the post spraying of corn done at Neely-Kinyon (NK)  
Randy got alfalfa raked and baled on the LTAR plots at NK  
Jim was busy with On Farm trials—Ryzup and Nitrogen studies  
Continue to monitor European Corn Borer traps  
John and I took down a section of truss on hay hoop---welds were broke—got repaired and  
back up before the winds came  
John did some maintenance on hay rake  
Dan spot sprayed thistles in STRIPS project with Tim Younquist  
Randy met with Laura Irish and the Master Gardeners on garden project  
Sorghum was planted at NK  
Feedlot pen work continued—now that it is finally drying out  
Dan applied V5 side dress rates to Nitrogen X Tillage study  
Randy hoed both corn and soybeans in LTAR plots  
Dan and John flagged alleys in studies  
Dan started to put in alleys in studies  
John disked rootworm study and Dan got it planted  
Randy tilled the vegetable plots at NK  
John got people carrier ready for Western Farm to borrow  
Randy put in irrigation in the garden and replaced milkweed plants that did not over winter  
Dan flagged and staked out Cardinal and Standability study  
Started to clean up and put away planters  
Randy got hay done at Armstrong  
Still doing some prep and planning for electronic bunks in feedlot

Any questions, please let us know. Another busy week planned and also getting ready for a wedding to be held at the Learning Center this weekend.
