

Crops are starting to really change with the warmer weather at the end of the week. Armstrong recorded .66 of an inch of precipitation and Neely-Kinyon (NK) recorded .2 of an inch for the week.

Activities:

- Randy did some spraying of Canadian thistles in STRIPS project at NK
- Dan set up running inventory of our chemicals
- Randy got LTAR corn and soybeans hoed
- Mowing of lanes and lawns continued, along with spraying weed around buildings, etc.
- Loaded out one load of corn
- John replaced a broken fence post and rehung gate
- Jim is putting finishing touches on side dress machine with Y-drops
- Soybean breeders were here to put in their plots
- Sorted off 5 head of bulls to monitor to possibly send back to McNay
- Jim is making more contacts for On Farm projects
- Randy mowed and tilled vegetable plots at NK

We are watching for a window to put down hay at both farms, but does not look rea promising this week.
