

This past week was good for getting some harvesting done in the area. We got several corn studies done and will do a couple more today and switch to soybeans later in the day. Armstrong received .55 of an inch precipitation for the week and Neely-Kinyon received .57 of an inch.

Activities:

Corn studies harvested:

First harvest date of Standability

Long term Nitrogen study

Cardinal Trial

N X Timing Study

Long term tillage

P X tillage study

K X tillage study

FACTS Study

Wyffel's plots

Stine's plots

Hauled some manure in preparation for cattle arriving

Jim got some more ON Farm trials out

Randy got garden tilled

Looks like another good week for harvest, with some cooler temperatures later in the week.
