

It was a damp week here and anxious to get back in the fields. Armstrong recorded 2.73 inches of precipitation for the week and Neely-Kinyon recorded 2.8 inches.

Activities:

Continued checking over harvest equipment

Got tarp put on weigh wagon

Marked harvest rows and got stand counts taken

Tim Goode came down to meet with hoop building company to see what our options are for the cattle hoop. Shawn Shouse and myself were also there to discuss our options.

Tim also did a walk through the house on the farm and stopped by Neely-Kinyon to look at enclosing the shed, etc.

Randy was able to get the garden area cleaned up

Dan is working with all of us on all crop projects to make sure we all know the protocols and who to contact if we have any questions.

It was a great weekend to be a Cyclone!
