

It was another busy week harvesting on both farms. There was no precipitation recorded at either farm for the week and had our first killing frost on Friday night here.

Activities:

Stith Wiggs was here to harvest Neonic and soybean fungicide projects

Harvested—soybean project

K X Tillage

P X Tillage

K study on North 80

Stine seed study

Licht's University of Minnesota study

Herbicide study

Date of Planting study

FACTS study

Bulk beans taken out

Harvested—corn studies

Second and third harvest date on Standability study (being this is a day late getting sent out)

Date of Planting study

Biochar corn plots

LTAR soybeans and organic soybean pest study at Neely-Kinyon

Tilled and seeded oat trial plots at Neely-Kinyon

On Farms studies continue being taken out

Met with Dan Loy and Erika Lundy on FIMS trial

Sounds like another good week a harvest weather and hope to have most of our corn at Armstrong out and more corn at Neely-Kinyon out.
