

Fall is upon us and crops are starting to change fast. Finally got some much needed rain in the area over the weekend and is currently raining as I am writing this update Armstrong recorded .65 of an inch and Neely-Kinyon recorded 2.21 inches for the week.

Activities:

Wyffel's field day had 110 FFA students and advisors in the morning and 30 producers attending in the evening.

NRCS was here to locate soil pits for upcoming District FFA Soil Judging contest to be held here on the 26<sup>th</sup> of the month. Lined up backhoe to get dug this week.

Technician with Harvest Master here to check out and update our system on the combine

Guys attended Cyclone Seed field day in Harlan

This last week was the final harvest for the Demo Garden

Continue to check and work on harvest equipment

Randy clipped LTAR oat plots at Neely-Kinyon

New bulk bin augers were picked up

Prep work for track hoe to come in and finish taking down some trees in wind break mangled in last June wind storm

On the 21<sup>st</sup>, a Stine's Seed field day will be held at the Armstrong Research Farm in the evening for local producers.
