

Crops are changing fast and some high moisture corn and a few soybeans have been harvested in the area this past week. Armstrong recorded .37 of an inch precipitation and Neely-Kinyon recorded .06 of an inch for the week.

Activities:

Soil pits were dug and other preparation for the District FFA Soil Contest to be held here the 26th.

Old windbreak at farmstead was started to be taken down due to so much damage from wind storm in June

John worked on getting new augers for bulk bins at the feedlot

Jim got extensions put on weigh wagon, prepared for painting and getting roll tarp installed

Garland Dahlke was here to install transmitter and receiver for wireless connection on FIMS system

Shiver's was here to install gearbox in grain bin

Stine's seed held a producer field day here at the farm on the 21st.

Continue maintenance and prep work on harvest equipment

Harvest is approaching and we might have some soybeans ready by the end of the week (depending on weather).
